### Teaching Phenomena-Based Earth & Space Science with National Geographic Learning

**Mark Hoffman**  
Senior Product Marketing  
Manager, K-12 Science

**Tuesday, January 26, 2021**  
**2:00 PM PT / 5:00 PM ET**

In this session, we will explore a wide variety of science phenomena from high school earth and space science and how to apply these to hands-on science lessons. Utilizing resources from National Geographic and the new *Earth & Space Science* program, we'll show how images, videos, and hands-on demonstrations connect students to phenomena and standards-based learning (including NGSS). Lesson ideas and teaching strategies will be appropriate for distance learning and classroom instruction.

**In this webinar, you will:**

- Get lesson ideas and strategies to meet specific Earth and Space Science standards
- Receive tips you can use right now to incorporate phenomena-based lessons with students
- Learn how to implement hands-on labs from the *National Geographic Earth and Space Science* program
